To

The Firms dealing in Oil Circuit Breakers.

Enquiry No. 3828.

OIL CIRCUIT BREAKERS FOR KOLAR GOLD FIELDS.

GENTLEMEN,

I write to request you to quote your best prices and the earliest time of delivery for the following materials :—

Three Oil Circuit Breakers, triple pole, single throw, 15,000 volts, 600 amperes capacity, having an interrupting capacity of not less than 75,000 KVA, complete with solenoid operating mechanism, 125 volts D.C. with closing coil, trip coil, control relay, terminals and auxiliary switches with frame work complete for cell mounting.

The general design and dimension shall be suitable for being installed in the low tension switch cells as shown in the sketch and drawing No. K. 139 and 142, copies of which will be sent on request.

The materials should conform to the following specifications :—

The switchgear should be non-oil throwing type with silver to silver main contacts, easily renewable arcing contacts and equipped with oil blast baffles and Herkolite bushings. The switchgear should be equipped with solenoid operating machanism for distant control 110-125 volts D.C. and to be equipped with modern control relays, so that if the closing of the breaker results in the operation of protective relays, the latter will energise the release coil of the control relay as well as trip the coil of the breaker. When the contacts of the relay are opened the closing coil has to be de-energised and the breaker should be quickly opened to prevent the pumping of the oil circuit breaker, even if the switch is held closed.

The switch should be suitable for mounting on the low tension switch cell wall, back to back, as per drawings K. 139 and 142.

The control relays for the oil circuit breaker should be equipped with trip-free toggle-mechanism, an auxiliary release coil for tripping the main contacts free from operating coil and resister internally mounted. The relays should be equipped with heavy duty contacts and should be suitable for distant control D.C. operating voltage of 110-125.

Full and detailed specifications of the equipment offered by you should be furnished in your tender, which should be accompanied by drawings showing the dimensions of the materials.

The price to be quoted should be for delivery f.o.b., Foreign Port and c.i.f., Madras.

This enquiry will close on the 25th February 1940.

No. S. P. C. 19560-62, *dated* 18*th December* 1939.
